

For 30 years, we at Stuart's Audio have brought to our clientele such classic audio componentry as the McIntosh MC275, the Marantz 9's, and the Mark Levinson ML2.

Now our association with Goldmund affords us the opportunity to bring you the Gold Cubes - audio amplifiers that immediately are established among the classics.

THE GOLDMUND GOLD CUBES

Superlatives won't do. What we have here is an amplifier that speaks for itself - that speaks the music.

What emerges from these five inch square monophonic swiss jewels is so compelling that Stuart's Audio has committed to all production for the first half of 1990. The U.S. premiere is presently taking place in our showrooms.

For those who have for so long sought this level of performance in the home, accept a Stuart's Audio invitation to audition the Goldmund Gold Cubes with us.

Production is limited to 300 pairs worldwide.

The Pair: \$22,000
